

AARAV DADDIKAR

PART 2

Tell me about yourself

To begin with, I have just finished Year 6 at Blacktown South Public School and am a part of the Year 7 2023 cohort of Reddam House this year. School is a place where I feel comforted around friends and have the ability to learn in a fun and stress-free way. I greatly enjoy getting involved and participating in new activities. For example, our school recently conducted a 'Peer Play' program, where children who find it difficult to communicate and express themselves are given the opportunity to connect and play with other students.

Extracurricular activities are also a major part of who I am. My main hobbies include Cricket and Debating. Sport is extremely fundamental for a child's health and Cricket is the one that caught my attention. Cricket allows me to relax and get my mind off things. It also helps me build stamina, hand eye coordination and concentration, which are all beneficial for my studies.

Debating is an extracurricular activity that I find fascinating. Debating gives me the capability to enhance my public speaking skills and also has numerous other benefits. [have this merged with the previous paragraph and expand this a tad bit more.](#)

Why I want to continue to be a Reddam House student

High school years are one of the most essential years of a child's education. It is those years that can shape the rest of one's life. That's why I strongly believe that attending a private school is the right path. My future goals revolve around public speaking and other fields where I believe I can thrive. If I am presented with the opportunity to leverage or hone my skills at Reddam, it will produce more of an outcome, compared to a public school.

Excellent piece! In making a good writing work that involves the reason why you are fit for your school of choosing, you MUST sell yourself and you did just that. You made it seem convincing as you enumerated the things you are good at as well as experiences. However, to add a cherry on top you could have also added how the school may be benefited upon your admission to the school. There are only minimal errors for this piece so good job!

Mark (50/50)
