

PART 2

Tell me about yourself...

My name is Alissa Chen and I am currently attending Ryde Public School. As a kindergartener I originally went to Newington Public School but then, moved to an OC (Opportunity Class). I am extremely thankful for being able to experience something new in this vast world I have met and made friends with so many wonderful and creative people who I would never had met before. If I wasn't given the chance. I play badminton and tennis, I also participate in swimming. Outer of the three my favourite would probably be badminton because it helps me feel more energetic and is really easy to learn. Some of my hobbies are reading, badminton, sketching floor-plans and playing flute. From young, I have always aspired to be a landscape architect so that I can inspire others to go for their dreams and what they believe in. Being a landscape architect would allow me to design a monument as a symbol to never give up and to pursue your dreams.

Some of the things I love the most Are family and friends. They are so important to me and are the people who carved the person I am today. My family have always supported my dreams and helped me to chase them. They always want whats best for me and what makes me happy. My friends comfort me through out hard times and make me smile when my world is blue. My friends and family light up my world and without them I'd only be a shell of the person they have shaped me to be. I owe so much to my family and friends yet they don't require anything from me but my happiness.

Note: This essay is very short. Adhere to the 300 word count requirement per item. Also, you did not answer the question 2. When introducing yourself, you have to also include your skills and successes in life. Its good that you told the audience a little bit about yourself; your interests, preferences, and so on. On the other hand, you should answer the question 2. Write in your answer the qualities that made you fit in your dream school.
