

Part Two.

Tell Me About Yourself:

*This part does not reach the 300 word count requirements.*

My name is Elvia Lin. I'm 11 years old and currently a student in the opportunity (OC) class at Ryde Public School. I'm part of the school debate team. I like debating because I can lead discussions and find flaws in not just the opposing teams arguments but also me teams! I love to read books and explore different genres. I've enjoyed all the types of books I've read, some are mystery books. I really enjoy reading mystery and crime books because the cryptic suspense always captures me and pulls me into the book like I'm really there. I also play two sports, swimming and tennis. Out of the two, I like tennis the most. When I play a perfect topspin in tennis, there's nothing better at the moment. I have many hobbies. They are playing tennis, reading, sudoku, playing piano and swimming. Out of those, my favourite is sudoku, this is because in sudoku you can play individually and in a group which makes me want to work faster. My role model is Rafael Nadal. What I most find inspiring about this 14 time French Open winner is his mindset. Nadal is always trying his 100% whatever the situation. His positive mindset reminds me to also have similar thinking with Rafael Nadal.

Tell Me Why You Are a Good Fit for MLC:

*Very short. Adhere to the 300 word count requirement.*

The MLC slogan is "Dare to be More". This is something that motivates me to go to this school. I like to embrace challenges whether or not they're big or small, I'll push through. I also want to go beyond my limits and discover more every time, I would fit with MLC because I want to be more. I would show MLC that I can attempt things outside my comfort zone. Another reason I would be a good fit for MLC is when I grow up I want to become an astronomer. However, this field has been dominated by men. But even with that I will still

want to be an astronomer. I want to do what other astronomers haven't done. Even with the astronomical field dominated by men I still want to make discoveries in the vast universe. I want to be more than what others may think about me.

Note: Your writing sounds confident and that is good. The introduction is also good since it is brief and catches the reader's interest instantly and make them want to read further. To further introduce yourself, you have to include your achievements and accolades. Strive hard to stand out while introducing yourself. On the other hand, this is very short. This writing should have 300 words per item. Adhere to the requirements next time to obtain a higher mark.

Mark 43/50
