

Tell me about yourself:

My name is ~~xxxx~~. <sup>Write your name here.</sup> From Kindy to Year 4, I was at Marie Bashir ~~public~~ <sup>Public School</sup> ~~school~~. I've been in the Summer Hill PS OC class since Year 5.

Summer Hill school is so far away from my home and I still remember my parents feeling frustrated because they had to drive ~~me to school to and~~ <sup>me to school and back.</sup> ~~back~~. To avoid this, I learned how to independently catch the train to and from school everyday which helped me make friends.

I am currently studying AMEB fifth grade for piano and have also learned how to play two new instruments, violin and ukulele and joined the Symphony Orchestra with other skillful musicians in my school. My favourite subjects are Drama, Music and Maths, because in Drama, you get to act and perform whatever character and their personality, in Music, you can create wonderful sounds from instruments and explore things like rhythm and in Maths you can learn about complex equations and figures you haven't heard of before. My favourite sport is definitely swimming, because I can interact with friends and stay healthy, since it's harder to move your arms in water than in the air. In fact, I'm so dedicated to swimming that I even wake up every Saturday at ~~5am~~ <sup>5 a.m.</sup> to attend swimming training!

In my free time, I enjoy reading a book or playing music on my piano or violin, since both these activities can calm me down and are fun to do as a break. I like reading all sorts of books, from fiction, like Harry Potter, to non-fiction, for example Horrible Histories. I have read a bit of Elon Musk as well! When I grow up, I'd like to become an AI engineer, because as an AI engineer you can design and invent new robots which will change the world significantly. It's also fun to test and experiment on what you can build with bits and pieces, making possibilities endless.

At the end of the year, I have received a Summer Hill Blue, the most prestigious award in our school which is really special. I also was awarded a swimming ribbon for representing my school in the swimming carnival 2022. I also received a top 10% in my school's Maths Olympiad test and got a gold badge in 2022.

Note:

You have introduced yourself in great detail, however, you need to say your name at the very first sentence, otherwise, listeners and readers won't continue listening to your introduction. On the other hand, you have to remember that you need to capitalise proper nouns as such the name of your school. Then, don't write sentences that are wordy. Your second sentence in the introduction must be revised. Remember to be concise but informative.
