

Ever since I was 4, I was so intrigued by the 26 alphabets, **by** how many **sounds** one letter can make, and how there are so many words(171,146 words). Every night before I slept, my parents used to give me words to spell which gradually increased my vocabulary and how I spelt more difficult words. As **the** years grew by, I started kindy, **in** 2018, and since then, I have been achieving the highest mark in the NSW Spelling bee in my grade, which gave me optimism and dependence to do better.

My second achievement is how I got 39/40 in ICAS maths. I was at first astonished by how I got 39 out of 40 and was **very** flabbergasted but I realised everyone can do well so I started trying harder. When I was in year 2, my teacher used to teach me algebra, **BODMAS**/bidmas and high school maths. So I started improving more and more.

I want to accredit my parents for helping me grow and never giving up on me and I also want to give **give** credit to my teacher who helped me learn important maths techniques I never knew about.

*That's astonishingly great to know about the extraordinary talent you have. You did an amazing job by following the checklist concisely.*

*Keep chasing your dreams and never give up!*

**47/50**
