NO.	QUESTION
1	If Sandra reads her handouts, she will pass the exam.
	If the above statement is true, which of the following statements must also be true?
	 A. If Sandra did not pass the exam, then she must not have read her handouts. B. If Sandra doesn't read her handouts, then she will definitely not pass the exam. C. Sandra will pass the exam only if she reads her handouts. D. Although Sandra doesn't read her handouts, she may still pass the exam.
2	
	Samsung Galaxy S22 Ultra and Apple iPhone14 Pro are both smartphones. All smartphones can send text messages. Most smartphones are wireless. Samsung Galaxy S22 Ultra and Apple iPhone14 Pro both take good pictures and are wireless.
	If the information in the box is true, whose reasoning is correct?
	In the mormation in the box is true, whose reasoning is correct?
	Naomi: "If a phone is wireless, it must be a smartphone."
	in a phone can send text messages, then it must be a smartphone.
	A. Naomi only
	B. Mia only C. Both Isabella and Naomi
	D. Neither Isabella nor Naomi
3	Taking the plunge to launch one's own business requires a certain amount of courage. To succeed, you will need to step
	outside of your comfort zone and experiment with new things. With that, people should start a business despite the large
	amount of work required and the degree of risk involved, since the potential for profits is great.
	Which of the following statements, if true, best strengthens the above argument?
	A. Taking a risk is vital because one can either gain rewards or learn insights from failure.
	B. Opening a business can help a person be comfortable with leaving his comfort zone.
	C. Trying out new things is beneficial because it's what helps people grow professionally.
	D. A person needs a lot of courage because it will help him conquer all things in life.

6	In a cosplay convention of 300 participants, 182 came dressed as anime characters and 93 had video channels where they posted cosplay tutorials.
	Which of the following must be true?
	A. 93 participants were both dressed as anime characters and had youtube channels.
	B. 118 participants came dressed as superhero characters.
	C. 89 participants who dressed as anime characters did not have a video channel.
	D. At least 25 individuals were neither dressed as anime characters nor had video channels with cosplay tutorials.
7	Learning exercises both the mind and the body. It exposes you to new experiences, educates your brain to solve problems, and keeps neural networks healthy. These components are beneficial to one's health. By educating yourself and trying new
	should require their children to learn new skills every month in order for them to be the best they can be, particularly in school.
	Which of the following statements, if true, best weakens the above argument?
	A. Teaching a child new skills every month would make him improve his academic skills.
	B. Forcing kids would make them exhausted, impairing their daily and academic performance.
	C. Kids who overwork and don't rest develop boredom with life.
	D. Children are too young to be trained and prepared for the trials and difficulties of life.
8	There are three chicken wing flavour variations on WingStop: Honey Mustard, Smokey BBQ, and Garlic Parmesan.
	Their manager, Kristelle, asked a total of 98 customers about their 2 most liked flavour variations. She found that:
	- People who like garlic parmesan do not like honey mustard.
	- All people who like smokey bbq also like garlic parmesan.
	 Most people who like honey mustard also like smokey bbq.
	- No customer liked all three flavours.
	If Abigail likes garlis parmesan, which of the following must be true?
	n Abigan inces game parmesan, which of the following must be true:
	A. Abigail must also like honey mustard.
	B. Abigail might like the smokey bbq flavour.
	C. Abigail does not like any other flavour variation.
	D. Abigail likes all flavours.

	2500
	Shop A Shop B Shop C Shop D
	His total expenses was \$1,800 and he wants his profit to be 10% of his total expenses.
	Which shop should he sell his fish to?
	 A. Shop A B. Shop B C. Shop C D. Shop D

Mica's grandmother will be celebrating her birthday next week. Therefore, she prepared the decorations and music for the upcoming event and showed her ideas to her family members. Mica is one who always goes for what's trendy to keep the atmosphere fresh. This preference is apparent in her initial preparations.

Her cousins, Lucy and Louie, had something to say.

Lucy: "Why did they allow her to be the organiser?"

Louie: "Indeed. She might make everything modernised causing the old ones to just go home and never attend any of our future parties. Also, they might not accept us as family members ever again."

Which of the following sentences show the mistake Louie has made?

- A. Louie incorrectly concluded a series of events just by knowing Mica's theme for the party.
- B. Louie generalised the outcome of the party just by knowing Mica's chosen theme.
- C. Louie chose to personally attack Mica instead of logically evaluating her chosen theme.
- D. Louie is arguing from a place of anger and jealousy.

35	Last month, five friends entered a marathon for charity.
	• Edward finished in 4 hours and 40 minutes
	Mark finished half an hour before Edward.
	Elle finished two minutes later than Edward.
	 Sally was ahead of Mark by five minutes.
	 Alex was faster than 3 of her friends.
	Who among the friends finished third?
	A. Alex
	B. Elle
	C. Mark
	D. Edward
36	Charles and Terry each won 40 yoghurt cups in an office trivia competition. However, their friend Jake could not participate
	and Charles thought it might be a good gesture to give him some yoghurt. Terry is hesitant, so Charles suggests they roll a
	dice.
	• If it is an even number. Charles will give Terry voghurt cups twice the number shown on the dice.
	 If it is an odd number. Terry gives Jake and Charles 6 cups each.
	Charles rolls a two. Terry rolls a three. How many yoghurt cups does Terry have at the end?
	A. 32 cups
	B. 42 cups
37	Minnie decided to donate her book collection to the school's reading club. Minnie has so many books, she can only take a
	portion to school every day.
	On the first day, she took 40% of her book collection and put it on an empty classroom shelf. By the end of the day, half of
	the books on the shelf have been taken.
	On the second day, Minnie took another 40% of the original collection to school. During this day, two thirds of the books on
	the shelf have been taken
	On the third day. Minnie brought the remaining books from her collection and there were now 50 books on the classroom
	shelf.
	How many books did Minnie have in her original collection?
	A. 125 books
	B. 250 books
	C. 335 books
	D. 400 books

	If the information in the box is true, where reasoning is correct?
	In the information in the box is true, whose reasoning is correct?
	Erik: "If you have to follow strict procedures, you must be performing surgery." Charles: "All surgeries are laboratory experiments."
	A. Erik only
	B. Charles only
	C. Both Erik and Charles
	D. Neither Erik nor Charles
Э	
	Whenever it rains, Po tries to make soup. When Po makes soup, there is always a pile of dishes in the sink afterwards.
	If the information in the box is true, whose reasoning is correct?
	Edgar: "There is a pile of dishes in the sink- it must have rained earlier."
	Allan: "Po will definitely make soup tomorrow if it rains."
	A. Edgar only
	B. Allan only
	C. Both Edgar and Allan
	D. Neither Edgar nor Allan
כ	Gaia is in the French club. Every member of the French club will go on a field trip to Paris next month. If you do not go on a
	field trip to Paris, you cannot climb the Eiffel Tower. Gaia wants to climb the Eiffel Tower with Emil, but Emil says he cannot
	climb it.
	Which of the following statements must be true?
	A. Emil is not a member of the French club.
	B. If Emil was a member of the French club, then he would be able to climb the Eiffel Tower.
	C. Emil will not be part of the field trip to Paris.
