

## Section 1:

### #1 (First paragraph): a. Strengths:

- Clear introduction of role models with specific examples
- Effective use of historical context to support choices

b. Weaknesses: Main issue: Lack of cohesion Your writing jumps between ideas without smooth transitions. For instance, you abruptly shift from discussing Churchill's wartime leadership to his Nobel Prize in Literature. This sudden change disrupts the flow of your argument. Consider linking these ideas more smoothly, perhaps by explaining how Churchill's leadership skills also manifested in his writing.

c. Exemplar: "Churchill's leadership during the war was exemplary, and his skills extended beyond the battlefield. His masterful command of language earned him the Nobel Prize in Literature, showcasing his versatility as both a statesman and a writer."

### #2 (Second paragraph): a. Strengths:

- Personal anecdote adds authenticity
- Demonstrates self-reflection and growth

b. Weaknesses: Main issue: Vague details Your personal example lacks specific details, making it difficult for the reader to fully grasp the situation. For example, you mention "many arguments" and "big ones" without providing context. Adding more concrete examples would strengthen your point about perseverance.

c. Exemplar: "I recall a particularly heated argument within our friend group about organising a school event. Despite differing opinions that threatened to split us apart, I mediated discussions and found compromises, ultimately bringing everyone back together."

### #3 (Third paragraph onwards): a. Strengths:

- Creative storytelling with interesting plot elements
- Incorporation of historical figures in a fictional context

b. Weaknesses: Main issue: Abrupt transitions Your narrative shifts suddenly between different scenes and time periods without clear connections. For instance, the transition from Ada's discovery to the appearance of the Temporal Constabulary is jarring. Consider adding transitional phrases or descriptive passages to smooth these shifts.

c. Exemplar: "As Ada processed the implications of her discovery, the greenhouse door burst open with a resounding crash. A stern voice cut through her thoughts: 'Step away from the Everywhen Fern!'"

Actionable task: Rewrite the second paragraph, focusing on one specific instance where you demonstrated perseverance. Provide concrete details about the conflict, your actions, and the resolution to make your example more impactful and relatable.

Overall score: 41/50

## Section 2: Revision Guidelines

My role model is Winston Churchill but if my role model is still alive ~~it's got to be~~ [it would have to be] Elon Musk. I chose these two specifically because they both persevered through very harsh and difficult times, for example Winston Churchill facing all kinds of difficulties in the war like evacuations, bombings and attacking the enemy. Despite all this ~~he still managed to~~ [he managed to] keep most of his people safe while defeating the enemy, in addition to winning a Nobel Prize in Literature. I chose Elon Musk as one of my role models because he achieved things that most people cannot achieve. From being born into a middle class, being bullied in early life and also financial difficulties in his early life ~~he is now CEO~~ [he became the CEO] of a few of the world's most notable companies like PayPal ~~to~~ [,] SpaceX ~~to~~ [and] the well-known Tesla. But he overcame bigger difficulties on the way to become the world's richest man ~~like~~ [such as] being on the brink of bankruptcy. People not believing in him only for him to persevere through and prove them wrong.

#2 I remember that I persevered through many arguments with friends and big ones with the friend group. But I just never gave up or kicked anyone out of the group. Sometimes I lost my mind but never lost hope. Sometimes I got in verbal fights but controlled myself not to get physical. Even when the group was split~~~.~~~ [,] I worked with some 'friends'(I guess) to fix it.

#3 A time travelling confusion

A [An] accidental discovery As 13 year old ~~Ava~~ [Ada] Lovelace, great granddaughter of a well renowned mathematician, glared at the abnormal data on her punch cards~~~.~~~ [,] The propagation rate of the specimen was preposterous. As she stared at the numbers and data with eyes shining with intellectual pedigree and bewilderment~~~.~~~ [,] ~~All of a sudden~~ [Suddenly] she gasped. "No...th...thi...this can't be!"she exclaimed. "It's not ~~hastily~~ [hasty]. It... it's skipping through time!" That was when the thought hit her... the centuries-old conspiracies of time-altering plants have finally been proven.

"What a contingency"muttered ~~Ava~~ [Ada] Lovelace. "What a contingency"she repeated in astonishment.

While lost in her thoughts ~~she abruptly remembered~~ [she suddenly recalled] that more of the same specimen of plants were being grown in the greenhouse where her tutor, Nikola Tesla ~~was~~ [worked]. So ~~he~~ [she] hurried ~~about~~ until she reached the greenhouse to inform Nikola Tesla about her ground-breaking discovery. When she arrived to inform Nikola Tesla of her discovery all she got was~~~.~~~ [:] "Extraordinary". As he watched the other plants open new windows to different eras. Before Ada could ask about the rows and columns of the specimen all lined up together~~~.~~~ [,] ~~The~~ [the] door erupted open. "Step away from the Everywhen Fern!"a voice ~~necessitated~~ [demanded]. "By order of Her Majesty's Temporal Constabulary!"

Just as a silhouette approached, Ada jolted awake only to be suffocated by the smoke ~~choked~~ [choked-]air. As Ada squirmed out of her bed~~~.~~~ [,] She took a glimpse out the window to the sight of London set ablaze, zeppelins aloft in the sky and the Thames ~~was boiled and~~ [had boiled dry]. "No," she murmured,"that's not how the Great War was meant to go." She numbed. Great War? What Great War? Ada didn't remember there was a Great War. As her memory was being rebooted~~~.~~~ [,]

She saw the team punching the time clock in the heart of the Great Fire of London, 1666. "Don't forget,"Ada bellowed over the blasts of the flames,"We can't change anything! We're here to preserve the timeline, not modify it!"Zahi nodded solemnly,then froze. "Ada,"he said ~~pleadingly~~ [slowly],"wasn't your family supposed to make a major scientific breakthrough because of this fire?" Ada's face blanched. "Oh no. We're the ones who were supposed to start it."

In a confidential compartment under London, Zahi meticulously aided the Chronos Tree,its branches stretching into different multiverses; it looked like it took up singularity. But the timeline ~~is~~ [was] still stabilising. "We'll need to observe carefully."Jack lounged against a temporal stasis pod, smirking. "Well then, who's here for a hasty trip to ancient Egypt and back? I ~~perceived~~ [perceive] they've got a sphinx that needs a new nose.
