

#1 (First paragraph): a. Strengths:

- Clear introduction of the topic and its importance
- Effective use of persuasive language to engage the reader

b. Weakness: Lack of specificity Your opening paragraph could benefit from more concrete details. While you introduce the topic well, you don't provide specific examples or statistics to illustrate the scope of the issue. This makes your argument less compelling and may fail to fully capture the reader's attention.

c. Exemplar: "As we continue to navigate the complexities of the digital age, a crucial issue demands our attention: the right of children to veto their parents' social media posts about them. A recent study found that 82% of children aged 9-16 feel uncomfortable with their parents sharing their photos online without permission, highlighting the urgency of addressing this matter."

#2 (Second paragraph): a. Strengths:

- Strong argument for children's autonomy
- Effective use of emotive language

b. Weakness: Oversimplification Your argument presents a somewhat black-and-white view of the issue. By stating that children have the same rights as adults in this context, you overlook the nuances of parental responsibility and the varying levels of maturity in children. This oversimplification could weaken your argument in the eyes of parents who are likely to be your primary audience.

c. Exemplar: "While recognising the role of parental guidance, we must also acknowledge that children, as they grow and develop, should have an increasing say in how their personal lives are portrayed online. This gradual empowerment aligns with their developing sense of self and helps prepare them for responsible digital citizenship."

#3 (Final paragraph): a. Strengths:

- Strong conclusion that ties together main points
- Effective use of persuasive language

b. Weakness: Lack of counterargument acknowledgement Your conclusion, while strong, doesn't address potential counterarguments or concerns that parents might have. This oversight could make your piece seem one-sided and less persuasive to those who might be sceptical about giving children veto power over social media posts.

c. Exemplar: "While some may argue that parents have the right to share family moments, we must balance this with the child's right to privacy and autonomy. By embracing this approach, we take a significant step toward creating a more respectful and considerate digital environment for our children, whilst still allowing for the celebration of family life online in a mutually agreeable manner."

Actionable task: Rewrite your opening paragraph, incorporating specific statistics or examples that illustrate the prevalence and impact of parents sharing content about their children online without permission. This will provide a stronger foundation for your argument and immediately engage your readers with concrete evidence.

Overall score: 41/50
