

## Section 1:

### #1 (First paragraph): Strengths:

- Strong opening with dialogue that immediately establishes the central conflict
- Effective use of emotive language ("cherished memories," "endearing") to create emotional investment

Weaknesses: Structural Coherence → Your paragraph shifts abruptly between direct speech and narrative description. The transition "declared Rick. The question echoed..." creates a disconnected flow. The final rhetorical question feels isolated from the preceding content.

Exemplar: "'Should we eradicate our endearing 3 Mile Beach to forge a colossal, glistening Fusion Power Facility?' Rick's question hung heavy in the air as the inquisitive crowd pondered both the advantages and imperilments of such a momentous decision."

### #2 (Second paragraph): Strengths:

- Detailed explanation of technical benefits
- Good use of comparative language to illustrate efficiency

Weaknesses: Speech Integration → Your dialogue tag "explains Rick" is positioned awkwardly after a lengthy technical explanation. The sudden shift to "The crowd marvelled" feels disconnected from the technical content presented.

Exemplar: "Rick stepped forward, his voice clear and measured. 'It is time for us to ascertain the benefits of replacing 3 Mile Beach with a Fusion Power Facility...'"

### #3 (Fourth paragraph): Strengths:

- Powerful emotional conclusion with the mother's dying words
- Effective use of imagery with stars gleaming

Weaknesses: Narrative Focus → Your paragraph begins with disconnected events ("Posters materialised," "Rick was a hero") before shifting to the emotional core of Rick's mother's message.

Exemplar: "As Rick watched posters materialising across town opposing the Fusion Power Facility, an ecstatic grin stretched across his face. He had fulfilled his quest - one given to him by his dying mother."

Actionable Task: Rewrite the first paragraph, focusing on creating smoother transitions between dialogue and narrative description. Ensure each sentence flows naturally into the next by adding connecting phrases and maintaining consistent emotional tone.

**Score: 41/50**

## Section 2:

~~#1 'Should we eradicate our endearing 3 Mile Beach to forge a colossal, glistening Fusion Power Facility,' Rick queried to the inquisitive crowd. ['Should we eradicate our endearing 3 Mile Beach to forge a colossal, glistening Fusion Power Facility?' Rick queried of the inquisitive crowd.]~~

~~'There are many advantages and imperilments to both sides of the decision. The Fusion Power Facility could benefit humanity. On the other hand, demolishing our cherished 3 Mile Beach is a vigorous thing to do, as if the 3 Mile Beach withers, so will our cherished memories in 3 Mile Beach,' declared Rick. ['There are many advantages and imperilments to consider. While the Fusion Power Facility could benefit humanity, demolishing our cherished 3 Mile Beach would be devastating. If 3 Mile Beach withers, so too will our cherished memories,' declared Rick.]~~

#2 'It is time for us to ascertain what the benefits of replacing 3 Mile Beach with a Fusion Power Facility. Fusion Power Facilities do not emanate CO2 or radioactive waste but instead ~~it~~ emits helium. These factories are among the ~~environment~~ [environment] friendly ones. Another sublime thing about a Fusion Power Facility is that it is almost four million times more energy than ~~smouldering~~ [smouldering] oil or coal, revealing its efficiency. Fusion Power does not have to rely on environmental activity like solar energy to operate,' ~~explains~~ [explained] Rick.

~~#3 Posters materialised against Fusion Power Facilities.~~ [Posters materialised throughout the town opposing the Fusion Power Facilities.] Rick was a hero for 3 Mile Beach. An ecstatic grin stretched across Rick's face. He had fulfilled his quest sent to him by his mom. The stars gleamed at Rick. Inside of Rick's mind, emerged the moment when his mom was dying from the fusion accident. ~~Her last words were lustier than the crowd.~~ [Her last words resonated more powerfully than the crowd's cheers.] 'Son, remember to always choose nature over artificial. I know that you are the one to create an exquisite equilibrium ~~‡~~ [in] this world.' Those words meant everything to Rick.

'Even though all of these statements ~~sounds~~ [sound] staggering, Fusion Power facilities have had numerous fatal accidents,' announced Rick. Suddenly, tears, engulfed by melancholy ~~cascaded~~ [cascaded] down Rick's crimson cheeks. 'An example of this is when my mom, Sarah Thompson was involved in one of these loathed flukes,' Rick ~~divulged~~ [revealed]. Gasps spread around the elephantine stage rapidly. 'The reason why Fusion Power Facilities are not used nowadays is because of the frequent and likelihood of accidents occurring. Furthermore, another reason we should not be exchanging this with the 3 Mile Beach is because nature in our life is fleeting. We keep on destroying poor nature to invent new structures in their places. One day, nature might be forgotten forever, unless we start to give it the respect it deserves,' ~~convincees~~ [concluded] Rick. The crowd deafeningly cheered.
