

Section 1:

#1 (First paragraph) Strengths:

- Effective emotional appeal through vivid imagery of animals in nature
- Strong hook with rhetorical question about a world without animals

Weaknesses: Unfocused Structure → Your opening paragraph combines multiple distinct ideas without clear transitions. The sudden shift from discussing animal extinction to rubbish disposal disrupts the flow. "Also, we should stop wasting rubbish" introduces a new topic abruptly.

Exemplar: "Imagine a world devoid of animal life - no monkeys swinging through trees, no pandas munching bamboo, no birds soaring overhead. Such a world would devastate our ecosystem's delicate balance. To prevent this grim future, we must act now."

#2 (Third paragraph) Strengths:

- Compelling example with turtle mistaking plastic for jellyfish
- Clear cause-and-effect relationship between waste and animal harm

Weaknesses: Inconsistent Tense Usage → You switch between present and past tenses. "Turtles swimming" then "said the turtle" creates confusion. The narrative needs consistent tense throughout.

Exemplar: "A turtle swims in the ocean, spotting what appears to be a jellyfish. Tragically, it's actually a plastic bag - a mistake that could prove fatal."

#3 (Final paragraph) Strengths:

- Strong concluding statement linking environmental care to human welfare
- Effective summary of main points

Weaknesses: Repetitive Phrasing → Your conclusion repeats phrases like "make a difference" and "sign a paper" without developing ideas further. The ending needs more sophisticated synthesis.

Exemplar: "Our actions today will determine the future health of our planet's ecosystem. By reducing waste, protecting habitats, and advocating for change, we can ensure a thriving Earth for generations to come."

Actionable Task: Rewrite your opening paragraph focusing on one main idea (either animal extinction or waste management) and develop it fully before transitioning to the next topic.

Score: 41/50

Section 2:

#1 Imagine the world will have no animals at all, no monkeys climbing the tree, no pandas munching on bamboo, no birds tweeting in the sky [;] the eco system will not be ~~even~~ [balanced] at all. ~~Would you want to live in a world like this.~~ [Would you want to live in a world like this?] Also, we should stop wasting rubbish and throwing it on the floor. Guess where it will end up! If you said the sea and/or in the soil, you are right. ~~On top of that it~~ [Additionally, it] is so easy to sign a piece of paper ~~with~~ [with] a pen. It might sound that ~~is~~ [it is] not going to do anything but trust me it is going to make a huge difference.

Firstly, imagine the eco system with no animals, it will not be balanced at all, not even a little bit. The earth will be so empty [:] ~~The~~ [the] trees empty, the sky empty, the land empty. ~~So, it is certain that we will bring this to an end.~~ [Therefore, we must prevent this from happening.] With no animals who is going to pollinate the plants so our food will be good for us to eat [?] A group of animals play a role in the carbon cycle. ~~With~~ [With] all of that they also eat pests like flies and mosquitoes. That is why we need to take care of the eco system.

#2 Secondly, we need to use less so we waste less because it mostly ends up in the sea. ~~Turtles~~ [Turtles] swimming in the ocean. "Ooh," a yummy jellyfish said the turtle! "~~Oh~~ [Oh] no it is a plastic bag!" Turtles ~~mistaken~~ [mistake] plastic bags as jellyfish. Lots of animals get strangled ~~on~~ [by] ropes and ~~cause~~ [causing] them not to breathe as well [;] they also might get stuck in bottles or plastic rings. That is one of the most common ways of ~~the~~ animals suffocating.

Note: ecosystem is just one word

Thirdly, you can sign a paper to help ~~the~~ [prevent the] loss and extinction of animals, and it is so simple, so if I can do it, you can do it too. By ~~signing~~ [signing]; you can help the **eco system** [ecosystem] get balanced. We also need to cut ~~less~~ [fewer] trees, ~~for~~ [as] there are a lot of animals who are going to get ~~distanced~~ [displaced] because they do not have a home. For example, orangutans, monkeys and lots more. By signing and committing that you will do all you can do you definitely make a massive difference, or the earth will not be clean and ~~heathy~~ [healthy].

#3 To conclude, it is important to make sure the **eco system** [ecosystem] is balanced and ~~heathy~~ [healthy]. Not wasting a lot of rubbish and to only take only what we need. Lastly, it is easy to ~~sign~~ [sign] a paper with a pen, and it will make a huge difference. Now I am sure you are persuaded that taking care of our ~~planet~~ [planet] will not only make a difference to the earth but also to us.

Sincerely,

Joy
