

Section 1:

#1 (School Contribution and Leadership) Strengths:

- Strong emphasis on leadership potential and willingness to participate
- Clear connection between personal development and school values

Weaknesses: Lack of Specific Examples → Your response about being a "good leader" and "good role model" would benefit from concrete examples of leadership experiences. Currently, your answer remains general when you mention "full range of experiences."

Exemplar: "I can offer your school my proven leadership abilities, demonstrated through my role as house captain where I successfully coordinated inter-house sporting events and mentored younger students."

#2 (Weaknesses and Growth) Strengths:

- Excellent demonstration of self-awareness
- Strong emphasis on personal growth and problem-solving

Weaknesses: Limited Scope of Development → While you effectively describe your progress with public speaking through debating, you could strengthen this by highlighting the impact of these improvements on your academic and personal growth.

Exemplar: "Through my year-long commitment to debating, I've not only overcome my public speaking challenges but also developed critical thinking skills that have enhanced my academic performance, particularly in English presentations."

#3 (Future Aspirations) Strengths:

- Clear career pathways identified
- Strong connection between personal interests and career choices

Weaknesses: Depth of Career Research → Your discussion of potential careers could benefit from more specific insights into why these professions align with your skills and academic strengths.

Exemplar: "My passion for biology and mathematics, combined with my experience in our school's STEM program, has sparked my interest in medicine. I'm particularly drawn to pediatrics because it combines my analytical skills with my desire to make a difference in children's lives."

Actionable Task: Rewrite your career aspirations paragraph by researching one specific profession in detail and connecting it explicitly to your current academic achievements and extracurricular activities.

Score: 41/50

Section 2:

I can offer your school a good leader that will set a good example and be a good role model to others. I want the full range of experiences and this school provides the full range of experiences and I will participate in activities that your school provides. #1 I also want to ~~maximize~~ [maximise] my potential in all learning areas and I have broad interests across all areas of school life. Some of my weaknesses are public speaking and time management.

~~#2 To improve my public speaking, I have been involved in debating practice and have persevered through it for about a year.~~ [For the past year, I have been actively involved in debating practice, persevering through challenges to improve my public speaking.] I have improved quite a lot which also makes me a good leader. I am able to speak in front of crowds now because of debating. ~~I have also improved with my time management by setting a timetable and a weekly planner for when to get my homework done.~~ [My time management has also improved through implementing a structured timetable and weekly planner for homework completion.] Before this weekly planner, homework would be difficult because I didn't have a set time. After the weekly planner was made, I was able to do my homework efficiently without any mistakes related to ~~organization~~ [organisation]. Some of my strengths are focus, curiosity and risk taking. I demonstrate risk taking when doing Maths at school. I am always trying to find a more challenging task to complete. The same applies with English and Science. Usually at school, when I am working with my friends some of them get carried away and start talking and become unfocused. I am always focused and I don't fall for their trap by also talking. I usually tell them to continue their work or I try to help them start working again. I am always asking questions at school and at home. I believe I am a naturally curious person who is always wanting to learn more. Some of my favorite [favourite] subjects at school are Maths, PE and STEM. I like Maths because I am always able to push myself further and challenge myself. Specifically, I like algebra and fractions because I find those the most challenging and fun to work with. Another one of my favorites [favourites] is Science. I like it because I find it interesting and I never really get bored of it. Currently, we are learning about forces and we have to run an experiment to learn more about them which is fun. I also like PE because I am a very sporty person. My ~~favourite~~ [favourite] sports are swimming and running.

#3 ~~In 6 years, I can see myself working towards a job that I am very passionate about.~~ [In six years, I envision myself pursuing a career that ignites my passion.] I will be going to work everyday with a smile waiting to enjoy my job. The job would most likely be a doctor, a vet or an engineer. I chose those jobs because I like helping other people and animals and I find the idea of coming to work and dealing with animals fun. When you are a doctor you can also meet new people such as your patients and other doctors. I would like to be an engineer because I am a creative person and always like to invent something new to help the community.
