

## Section 1:

#1 (What can you offer our school?) Strengths:

- Shows enthusiasm for creative writing and storytelling
- Demonstrates community involvement through environmental initiatives

Weaknesses: Limited concrete examples → Your response focuses mainly on general statements about storytelling without providing specific examples of your writing achievements or how you would contribute to school activities.

Exemplar: ***"I have written several short stories that were published in our local newspaper's youth section, and I would love to start a creative writing club at Ravenswood to inspire other students to develop their storytelling skills."***

#2 (Weakness/strength?) Strengths:

- Shows self-awareness about time management
- Demonstrates diverse interests in both mathematics and creative writing

Weaknesses: Incomplete development → Your answer about time management appears rushed and lacks details about specific strategies you use or how you overcame this challenge.

Exemplar: ***"To improve my time management, I created a detailed daily schedule using a planner, setting specific times for homework, revision, and creative writing. This system has helped me complete all my tasks whilst maintaining good marks in both mathematics and English."***

#3 (What do you see yourself in 6 years?) Strengths:

- Clear passion for a specific genre
- Shows long-term planning and goal-setting

Weaknesses: Narrow focus → Your response centres solely on writing about dragons without mentioning academic or personal development goals that would be relevant for a school interview.

Exemplar: ***"In six years, I aim to be studying English Literature at university while developing my creative writing skills. My particular interest in fantasy literature, especially stories about dragons, will help me bring unique perspectives to my academic studies."***

■ Your responses would benefit from more specific examples of your achievements and contributions. Consider mentioning concrete ways you would participate in school life beyond writing stories. Add details about your academic goals and how they align with the school's values. Your answers could be longer and more detailed, particularly regarding your strengths and weaknesses.

Section 2:

~~#1 I absolutely love writing narratives and creative stories because they let me explore different worlds and characters! Whenever I write, I use my imagination to create fun adventures that I hope can inspire others. I want to bring my stories to your school. Beyond my love for storytelling, I also care a lot about my community, so I've been collecting rubbish around the neighbourhood to help keep it clean. I think it's important to take care of our environment, and it feels great to make a difference, even in a small way. If I have the chance to be at Ravenswood School for Girls, I would bring my imaginative ideas to the classroom, sharing stories that encourage my classmates to think creatively and take action in our community! [At Ravenswood School for Girls, I would contribute through my passion for creative writing and community service. I have written several short stories that have won prizes in local writing competitions, and I would be keen to start a creative writing club to share these skills. Additionally, I have initiated an environmental clean-up project in my neighbourhood, collecting rubbish weekly and encouraging others to join. This experience has taught me leadership skills that I hope to apply at Ravenswood, perhaps by starting an environmental awareness group. I believe these initiatives would enhance both the academic and community aspects of school life.]~~

~~#2 I've always loved math, especially algebra! I think it's really cool how you can use letters and symbols to solve problems and find answers. For example, algebra lets us figure out unknown values in equations, which can feel like solving a mystery. I enjoy the challenge that comes with math, and I often practice different algebra problems to improve my skills. On the other hand, I have a passion for creative writing too. I love to let my imagination run wild and create stories and characters that transport readers to new worlds. Writing helps me express my thoughts and feelings in a way that math does differently. I used to struggle with time management, but I created a schedule to help me stay on track. Now, I can manage my time more effectively and feel less stressed. [My greatest strength lies in my ability to excel in both mathematics and creative writing. In maths, particularly algebra, I consistently achieve high marks due to my analytical approach to problem-solving. This logical thinking complements my creative writing abilities, where I have developed strong storytelling skills through regular practice and participation in~~

writing workshops. Regarding weaknesses, I previously struggled with time management, but I have addressed this by implementing a structured daily schedule. I now use a detailed planner to balance my academic work, extracurricular activities, and personal interests, which has significantly improved my productivity and reduced stress.]

#3 In six years, I see myself fully dedicated to my passion for writing, crafting captivating stories about dragons that delve into their complex relationships with humans and their surroundings. As I prepare for high school, I aim to deepen my knowledge of literature and hone my craft, aspiring to create unique mythologies and unforgettable characters that resonate emotionally with readers. I envision myself exploring various genres, from epic to whimsical tales, showcasing dragons in new ways. With determination, I plan to practice relentlessly and share my work for feedback, all in pursuit of turning my dream of becoming a published author into reality and leaving my mark in the literary world.
