

## Section 1:

### #1 (First paragraph) Strengths:

- Clear introduction of the UBI concept and its significance
- Strong thesis statement that outlines the main arguments

Weaknesses: Lack of specific context → Your opening could be strengthened by providing concrete context about why UBI has gained attention recently. The phrase "garnered significant attention" would benefit from specific examples or timeframe.

Exemplar: "Universal Basic Income (UBI) has gained unprecedented attention since 2020 as a potential solution to rising economic inequality, widespread job displacement and persistent poverty."

### #2 (Second paragraph) Strengths:

- Effective use of COVID-19 example to illustrate UBI benefits
- Clear connection between financial security and personal development

Weaknesses: Underdeveloped transition → Your paragraph shifts abruptly from discussing COVID-19 support to education investment. The phrase "By reducing financial stress, UBI allows individuals to seek meaningful employment" needs a smoother connection to the previous ideas.

Exemplar: "The COVID-19 pandemic demonstrated that guaranteed income support not only helps cover basic needs but also enables individuals to make long-term investments in their future, whether through education or career development."

### #3 (Final paragraph) Strengths:

- Strong concluding statement that ties all arguments together
- Effective use of forward-looking perspective

Weaknesses: Redundant phrasing → Your conclusion repeats phrases like "economic security" and "social equity" without adding new depth. The final sentence would be more impactful with more specific future implications.

Exemplar: "As we navigate an increasingly automated and uncertain economic landscape, implementing UBI nationwide offers a transformative approach to building a society where every citizen can thrive."

Actionable Task: Revise your second paragraph by creating a detailed outline that maps the logical progression from COVID-19 financial support to education and employment opportunities. Include specific transition sentences between each main point.

Section 2:

Universal Basic Income (UBI) has ~~garnered~~ [gained] significant attention as a potential solution to economic inequality, job displacement and poverty. UBI proposes that every citizen ~~recieve~~ [receive] a guaranteed sum of money regularly, regardless of employment status. This policy is not just a financial tool; it ~~adreses~~ [addresses] fundamental societal needs. By examining UBI's potential to enhance economic security, promote social equity and ~~adress~~ [address] moral obligations, it becomes evident that implementing this ~~poler~~ [policy] nationwide is essential for creating a fairer and more equitable society.

#1 One of the strongest arguments for UBI is its potential to enhance economic security for individuals and families. The modern job market is increasingly unpredictable, with many facing layoffs or ~~reductions~~ [reduction] in hours due to automation and economic upheaval. UBI would provide a financial safety net, allowing people to meet their essential needs during unemployment or underemployment. For example, during the COVID-19 pandemic, direct assistance from the government demonstrated how crucial cash support is during crises. Many individuals used this assistance to cover basic costs, illustrating how guaranteed income can stabilise consumer spending and the economy. By reducing financial stress, UBI allows individuals to seek meaningful employment or invest in their education.

#2 Universal Basic Income (UBI) can help social equity by reducing wealth differences. Many live in poverty, while only a small amount holds most of the wealth. Research shows that a basic income could lift many above the poverty line, allowing families to afford essentials like food, housing and healthcare. UBI gives individuals financial stability, enabling them to engage with their communities and plan for their futures.

As poverty decreases, society benefits because individuals can concentrate on personal development instead of merely struggling to survive. This shift ultimately contributes to a ~~stronge~~ [stronger] economy in the long term.

The moral argument for UBI is essential to consider as well. Granting every citizen a basic income reflects our commitment to human dignity and acknowledges the inherent value of all individuals. Many people contribute to society in ways that traditional economic measures often

overlook such as caregiving and community service. UBI recognises these contributions by providing financial support and fostering a culture of respect and mutual responsibility. By addressing systemic inequalities and ensuring that no one is left behind, UBI promotes social justice and unity within the community.

#3 In conclusion, implementing Universal Basic Income nationwide offers a comprehensive solution to pressing economic, social and moral challenges. By enhancing economic security, promoting social equity and reinforcing our ethical obligations to support one another, UBI can help create a more just and inclusive society. As we navigate the complexities of contemporary economic issues, exploring innovative approaches like UBI is vital for building a brighter and more equitable future for all citizens.
