

## Section 1:

### #1 Opening Paragraph Strengths:

- Vivid sensory details create a powerful emotional impact ("grim faces," "rusty fold-out table")
- Effective contrast between despair and hope, building towards the UBI solution

Weaknesses: Structural coherence → Your opening imagery, while evocative, becomes disjointed with rapid shifts between different scenes and metaphors. The transition from homeless people to bills to robots feels abrupt. The phrase "under the grave of financial debts" particularly disrupts the flow of your narrative.

Exemplar: "Imagine our streets filled with those bearing the weight of poverty - their faces etched with hardship, their possessions limited to rusty fold-out tables and portable fridges. As robots increasingly populate our workplaces, these scenes of quiet desperation call for a compassionate solution: Universal Basic Income."

### #2 Second Paragraph Strengths:

- Clear presentation of the automation challenge
- Good use of specific numerical evidence

Weaknesses: Argument development → Your argument relies heavily on stating facts without fully developing their implications. The phrase "UBI can act as a shield" introduces an important point but doesn't elaborate on the mechanism. Your example about UBI experiments feels disconnected from your main argument about automation.

Exemplar: "UBI offers a vital safety net as automation reshapes our workforce. With 800 million jobs at risk globally, this programme would provide workers the financial security to adapt through reskilling and education, as demonstrated by numerous pilot programmes where participants reported reduced stress and increased career mobility."

### #3 Final Paragraph Strengths:

- Strong moral argument about human dignity
- Effective connection to broader societal values

Weaknesses: Conclusion strength → Your conclusion feels rushed and repetitive, particularly in phrases like "UBI is crucial" and "UBI is the bedrock foundation." The final statement doesn't effectively synthesise your key arguments.

Exemplar: "Universal Basic Income represents more than economic policy - it embodies our commitment to human dignity and shared prosperity, ensuring that technological progress serves all members of society, not just a privileged few."

Actionable Task: Rewrite your second paragraph focusing specifically on creating clear logical connections between automation, job loss, and how UBI directly addresses these challenges. Include specific examples of how UBI would help workers transition to new roles.

Section 2:

#1 Imagine a world where streets are teeming with homeless, ~~beggers~~ [beggars]. Their grim faces are only a symbol of the ~~exulpatine~~ [excruciating] pain and suffering they have gone through. Bills lie on the rusty fold-out table. The memory of food from last year, saved as a precious jewel in their small portable fridge. ~~They tremble under the grave of financial debts,~~ [They struggle beneath crushing financial debts, while] robots move around, silently but dangerously, replacing workers with their tireless metal body. Universal Basic Income illuminates a path forward, transforming these scenes of quiet desperation into moments of dignified choice.

#2 UBI offers a promising solution to the increasing automation of jobs. As technology advances, many workers face displacement in industries such as manufacturing, retail, and transport. According to an accurate report, up to 800 million jobs globally could be lost to automation. ~~UBI can act as a shield~~ [UBI can act as a shield] promoting a stable salary while workers shift to new roles or pursue reskilling and studying. For example, UBI experiments all over the world have countless participants who reported that they reduced stress and increased motivation to find better work, even though it did not significantly impact employment rates. ~~UBI is solution to~~ [UBI is a solution to] the world's automation takeover.

Additionally, UBI helps to get rid of poverty and inequality. In countries such as America and China, the poverty rate was approximately more than 15%, with millions of individuals struggling to meet basic needs for food and survival. ~~A nationwide UBI would a basic standard~~ [A nationwide UBI would ensure a basic standard] of living, regardless of employment ~~staties~~ [statistics]. A study in Alaska has shown that such income redistribution not only reduces poverty but also improves local economies as people spend their additional income. Additionally, it provides people with the freedom to pursue education or creative endeavors without the constant pressure of financial survival. UBI is crucial for getting rid of homelessness and poverty.

Moreover, UBI acknowledges the dignity of every person by guaranteeing financial security. It reflects the belief that citizens have a right to share in the wealth generated by society, particularly when technological advances and wealth concentration leave many behind. Providing UBI would recognize the value of work outside the traditional job market, such as caregiving or volunteering, which are often undervalued but essential.

~~#3 inconclusion~~ [In conclusion], UBI is crucial for the economic status of the country, its positive social impact, and the dignity of the people who are homeless or are living in poverty. UBI is the bedrock foundation of our society and economy, ensuring a bright future for human beings.
