

Section 1:

#1 "Hi my name is Yozil, I come from the year 2060, it is not really clean and I came here to 1980 to tell you to recycle clean and take some responsibility" Strengths:

- Creative opening using time travel grabs attention
- Clear call to action about recycling and responsibility

Weaknesses: Run-on sentences → Your opening contains multiple ideas joined incorrectly with commas. Your message about responsibility becomes unclear when mixed with too many thoughts.

→ ***"Hi, my name is Yozil. I have travelled from the year 2060 to share an important message about recycling and taking responsibility for our planet."***

#2 "because right know the climate is so bad because know one cleaned and most of our plants animals and us are dying due to pollution" Strengths:

- Discusses important consequences of pollution
- Links actions to outcomes

Weaknesses: Word choice and clarity → Your message loses impact because of spelling mistakes and unclear linking of ideas. The connection between cleaning and climate needs more detail.

→ ***"The climate has become dangerous because people did not clean up properly. Our plants, animals and humans are suffering from the terrible effects of pollution."***

#3 "and the meaning of pollution is, the addition of any substance (solid, liquid, or gas) or any form of energy" Strengths:

- Attempts to provide helpful definition
- Includes different types of pollution

Weaknesses: Flow and engagement → Your definition feels disconnected from your main message. It sounds like it was copied rather than explained in your own words.

→ ***"Pollution happens when harmful things like rubbish, dirty liquids and bad gases build up faster than nature can clean them away."***

■ Your piece has a strong message about protecting our environment. You could make your writing more powerful by breaking up long sentences into shorter ones. Also, try telling more about what happens when people don't recycle properly. Additionally, you could describe what a clean future looks like to help readers picture why they should care. Your time traveller story is

interesting - build on it by sharing more details about life in 2060. You might want to focus on one problem at a time instead of mentioning lots of different issues quickly. Try adding examples of simple things people can do to help keep the environment clean. Remember to check your spelling carefully as it will help readers understand your message better.

Score: 36/50

Section 2:

~~Hi my name is Yozil,~~ [Hi, my name is Yozil.]

~~I come from the year 2060, it is not really clean and I came here to 1980 to tell you to recycle clean and take some responsibility~~ [I come from the year 2060. Our world is not clean, so I have travelled back to 1980 to tell you about the importance of recycling and taking responsibility.] #1

~~because lots of people will struggle and u can't just rely on them then its not fair if u clean now in the future will be a better place~~ [Many people will struggle if we don't act now. You cannot rely on others - it's only fair that everyone helps to make the future a better place.]

~~because right know the climate is so bad because know one cleaned and most of our plants animals and us are dying due to pollution~~ [The climate has become terrible because no one cleaned up properly. Our plants, animals and even humans are dying because of pollution.] #2

~~and our pollution can also bring harmful liquids such as toxic, it can bring harmful gas such extraction and processing involves~~ [Pollution brings harmful toxic liquids and dangerous gases from extraction and processing.]

~~many hazardous substances including those that cause cancer, interfere with hormones, trigger asthma and contaminate the local environment through airborne pollution~~ [These hazardous substances cause cancer, interfere with hormones, trigger asthma and contaminate our local environment through air pollution.] ~~and wastewater so I please recommend you to start cleaning so in the future kids can learn why not to leave rubbish lying on the ground~~ [The waste water is dangerous, so I strongly urge you to start cleaning now. This way, future children will learn not to leave rubbish on the ground.]

~~and the meaning of pollution is, the addition of any substance (solid, liquid, or gas) or any form of energy (such as heat, sound, or radioactivity) to the environment at a rate faster than~~ [Pollution means adding substances (solid, liquid or gas) or energy (like heat, sound or radioactivity) to the environment faster than] #3 ~~it can be dispersed, diluted, decomposed, recycled, or stored in some~~

~~harmless form so i please recommend you to start cleaning.~~ [nature can disperse, dilute, break down, recycle or store them safely. That's why I strongly recommend you start cleaning now.]
