

Section 1:

#1 - First paragraph Strengths:

- Vivid contrast between Brazilian and Mongolian cultures
- Creative concept of cultural fusion with specific details about parties

Weaknesses: Cultural representation inconsistency → Your cultural percentage claim ("one sixth of a Brazilian party is culturally related") lacks factual support and contradicts your earlier statements about samba and food being cultural elements.

Exemplar: *Brazilian festivities deeply interweave cultural elements throughout their celebrations, from the rhythmic samba dancing to the aromatic traditional cuisines, creating an inclusive atmosphere that welcomes people from all backgrounds.*

#2 - Second paragraph Strengths:

- Engaging description of the carnival's progression through streets
- Clear emphasis on the inclusive nature of Brazilian celebrations

Weaknesses: Time specification imprecision → Your time reference "ten in the morning" to "ten in the night" needs more context about whether this is a typical duration or a specific event. The statement appears abrupt without supporting details.

Exemplar: *These vibrant celebrations often span entire days, typically beginning at dawn and continuing well into the night, with each hour bringing new waves of enthusiastic participants.*

#3 - Final paragraph Strengths:

- Interesting visual contrast between Brazilian and Mongolian elements
- Creative visualization of colour contrasts

Weaknesses: Development limitation → Your conclusion about the benefits feels rushed with the phrase "This benefits everyone, ensuring a fun time." It needs more specific examples of how this cultural fusion creates positive outcomes.

Exemplar: *This unique fusion of Brazilian vibrancy and Mongolian serenity creates an extraordinary cultural experience, where traditional dances enliven the vast steppes and carnival colours paint new life across Mongolia's natural canvas.*

→ Your writing presents an intriguing concept but needs more detailed development of ideas. You've touched upon fascinating cultural elements but could delve deeper into specific examples of how these two cultures might meaningfully interact. Your descriptions would benefit from

more sensory details and concrete examples. Consider expanding each section with more specific details about both cultures.

Actionable task: Rewrite your final paragraph focusing on three specific ways the Brazilian carnival elements would interact with Mongolian landscapes and traditions, using detailed sensory descriptions for each interaction.

Score: 40/50

Section 2:

Brazil in Mongolia

Brazil has the loudest, beautiful and memorable parades, consisting of samba dances and lots of food. ~~Now let's go to~~ [Moving our attention to] the other side of the world, Mongolia, a calm, peaceful Asian country. Imagine putting these festive crazy parties in the grassy urban hills of Mongolia. A company called Fusion is actually hosting a Brazilian party in the heart of Mongolia. The number of Brazilian companions in Mongolia is very small. ~~That's why there are not many parties and festivals Brazilians can attend.~~ [This small population limits the Brazilian cultural events available.] #1 Most parties in Mongolia are culture related and people who aren't part of their culture will have a hard time coping with all the rituals. But Brazilian parties are welcome to the whole population since one sixth of a Brazilian party is culturally related. The only cultured part is Samba and food but these delectables are amazing.

#2 Brazilian carnivals are loud and bold. Most parties happen in the streets [,] ~~Celebrating~~ [with people celebrating] their way through the town. As more and more houses pass [,] the more and more people come to dance and have fun. One thing that is amazing is that these parties are welcome to anyone, so if you love to dance and meet new people or learn about Brazilian culture, then you will definitely love going to these parties. These parties last for a really long time ~~if~~ [, if] you go at ten in the morning you will come back at ten in the night.

Now back in Mongolia [,] there are beautiful urban grasslands where animals roam. There are also many alpine tree forests and there are also many lakes where small ducks and fish travel daily. Also [,] Mongolia is very hot in some places and in some there are long freezing winters that can go below negative 45 degrees.

#3 Imagine combining the Brazilian parties with their ~~naturistic~~ [naturalistic] Mongolia. That is a weird combination. ~~But~~ [But] if we do happen to put on Brazilian parties [,] other people from Mongolia will be able to meet new people, dance and enjoy. This benefits everyone, ensuring a

fun time. Imagine the fun~~right~~ [bright] bold ~~colors~~ [colours] of the Brazilian ~~part~~ [party] stand out in the cool tones of Mongolia.
