

Have you ever ^{wondered} what the best A4 colour is? Well it is ^{definitely} definitely white. It may sound really boring but it also has some ^{benefits} benefits. firstly it is ^{cheapest} cheapest because other colours such as blue and yellow will need ^{artificial} artificial coloring, ^{where} as white is just white. ^{artificial}

^{colours}

colours come out best when they are on white paper because there is no colour so you can see all colours. you can also ^{easily} easily blend colours on white paper such as ^{as} red to orange.

finally, white is most formal if you are working or ~~have~~ an exam, words and colours will come out ^{really} really

clear.

So it is ~~very~~^{very} clear that the best colour of A4 paper is white. As it fits with everything!
