

Section 1:

#1 "You might think that recycling is "rubbish" or "overrated" but it is really crucial to do this because "Reduce, Reuse, Recycle" is an exceptionally supportive for all animals an not just animals, us too!"

Strengths:

- Your opening engages readers by addressing potential counterarguments
- Your use of the famous "Reduce, Reuse, Recycle" slogan adds credibility

Weaknesses: Run-on Sentence Structure → Your sentence combines too many ideas without proper punctuation. The phrase "exceptionally supportive for all animals an not just animals" is unclear and repetitive.

Your opening could be: "While some may dismiss recycling as 'rubbish' or 'overrated', the principle of 'Reduce, Reuse, Recycle' is crucial for protecting both animals and humans alike."

#2 "When you recycle your rubbish it is like giving your old materials a second chance, just like a caterpillar transforms into a butterfly."

Strengths:

- Your metaphor effectively connects with young readers
- Your positive tone makes recycling appealing

Weaknesses: Underdeveloped Comparison → Your butterfly metaphor needs more development to clearly show how recycling transforms materials. You introduce an interesting comparison but don't explain how it relates to recycling.

Your metaphor could be: "When you recycle your rubbish, you give materials a second chance at life - just as a caterpillar transforms into a beautiful butterfly, your old bottle can transform into a new useful item."

#3 "Imagine our planet as a sinking ship, weighed down by mountains of waste-recycling is a lifeboat that can save us all."

Strengths:

- Your imagery creates a powerful visual

- Your metaphor effectively conveys urgency

Weaknesses: Limited Development → Your metaphor needs more specific details about how recycling acts as a "lifeboat". You don't explain the connection between waste and the sinking ship clearly.

Your metaphor could be: "Imagine our planet as a sinking ship, weighed down by mountains of waste. Just as a lifeboat rescues passengers, recycling can save our planet by reducing the weight of waste in landfills."

■ Your speech has creative metaphors but needs more specific examples of how recycling helps. You jump between different ideas without fully developing them. Try to focus on one strong point in each paragraph and support it with clear examples. Your speech would be more persuasive if you included local recycling statistics or specific actions your audience can take. Make your metaphors work harder by explaining how they connect to recycling.

Actionable Task: Rewrite your second paragraph focusing on developing the butterfly metaphor - explain step by step how materials transform through recycling, just like a caterpillar's transformation stages.

Score: 40/50

Section 2:

~~You might think that recycling is "rubbish" or "overrated" but it is really crucial to do this because "Reduce, Reuse, Recycle" is an exceptionally supportive for all animals an not just animals, us too!~~ [You might think that recycling is "rubbish" or "overrated", but "Reduce, Reuse, Recycle" is crucial for supporting both animals and humans alike.] Can you imagine the Earth, covered with our waste and trash, the air now polluted, animals suffocating because of plastic straws that we have used? Right now in the year 2060, the majority of people are suffering due to the impacts of climate change and in the 1980s people ~~relax~~ [relaxed], with no cares in the world about those poor next generations! Just by recycling your rubbish, you can absolutely make a difference in protecting the environment and the people you love. Recycling is really exciting and an adventure, full of creativity and surprise, not just about bins and trash. STEP up, CLEAN up and let your imagination run ~~wide~~ [wild]!

#2 When you recycle your rubbish [,] it is like giving your old materials a second chance, just like a caterpillar transforms into a butterfly. Doing this stops junk in its tracks, diverting it away from landfills, which reduces the extremely harmful effects of pollution and greenhouse gas

emissions. This also means that less of our trash ends up on the sides of roads, floating in our oceans and littered in parks. Picture a world where all animals are safe and sound, not strangling ~~plastic bags because we ALL recycled~~ [in plastic bags, because we ALL chose to recycle].

EVERY SINGLE day, countless recyclable materials end up in landfills, contributing to pollution and wasting precious resources that could be reused and turned into something great-~~yet the solution starts right here in your homes and schools~~ [and the solution begins in your homes and schools]. It is not just putting rubbish in the bin that could conserve Mother Nature's beauty, ~~there is~~ [there are] millions of small things you can do at home and at school that could change the future, for example ~~setting up~~ [set up] classroom recycling centres, at home you can take shorter showers, ~~recycling~~ [recycle] bottle caps for games or art projects and tons more. Indeed they are small but these tasks can help ~~at~~ [a] mighty big amount!

#3 Imagine our planet as a sinking ship, weighed down by mountains of waste-~~recycling is a lifeboat that can save us all~~ [recycling acts as a lifeboat that can save us all]. By joining the recycling movement we can turn trash into treasure and give discarded materials a new purpose while keeping the environment afloat! Joining is essential for several reasons, some key reasons are resource conservation-recycling helps conserve natural products like water, trees and minerals, environmental protection-recycling reduces waste that ends up in oceans, helping protect the environment and wildlife and of course the future generations- recycling ensures the safety of many generations to come, promoting a liveable planet.

In conclusion, recycling is going to save many people, including the planet and you can have fun cleaning by ~~up-cycling~~ [upcycling] used products. All you need to do is listen to me, hear me loud and clear, recycling is essential and if you do listen carefully there is going to be a massive change. So let's do this, work together and become a recycling CHAMPION!
