

Section 1:

#1 (Introduction and first paragraph) Strengths:

- Your opening question effectively engages readers
- Your topic sentence clearly states your position about white paper

Weaknesses: Lack of specific supporting details → Your claim about white paper being "easy to read from" needs more specific examples. You mention math homework and reading comprehension but don't explain how white paper specifically helps in these situations.

Exemplar: *White paper enhances readability by providing a clear background for both handwritten math equations and printed text, making it easier for students to review their work and learn effectively.*

#2 (Second paragraph) Strengths:

- Your creative angle shows white paper's versatility
- You compare it with another colour to strengthen your argument

Weaknesses: Underdeveloped comparison → Your comparison between white and blue paper lacks depth. You simply state blue has "no possibilities" without explaining why white paper's blank canvas is superior for creativity.

Exemplar: *Unlike coloured paper that limits your artistic choices, white paper allows you to express yourself freely - you can draw vibrant pictures, create colourful designs, or craft beautiful patterns without any colour clashing.*

#3 (Final paragraphs) Strengths:

- You consider the practical aspect of cost
- Your conclusion restates your main points

Weaknesses: Limited evidence for affordability → You state white paper is "affordable" and "perfect for people" but don't provide any specific reasons why it's more cost-effective than coloured paper.

Exemplar: *White paper is not only widely available in all local shops, but it's also typically less expensive than coloured varieties, making it the smart choice for families on a budget.*

■ Your persuasive speech would be more convincing if you added specific examples and details to support each of your points. Try to explain why white paper is better than other colours using real-life situations that your readers can relate to. Your writing is quite short - you could make each paragraph longer by adding more evidence and explanations to support your arguments.

Actionable Task: Rewrite your second paragraph focusing on providing three specific examples of creative projects that work better with white paper than coloured paper.

Score: 37/50

Section 2:

The best A4 colour paper

~~Have you ever wondered what is the best A4 coloured paper? There are many different hues but a simple white is just the perfect colour.~~ [Have you ever wondered what the best A4 coloured paper is? While there are many different hues, a simple white is the perfect colour.] It is because white paper is easy to read from, and it is priceless. #1

~~Firstly, white paper is easy to read from.~~ [Firstly, white paper is easy to read from.] You can see how you worked out a question in your math homework and the reading text from your reading comprehension. ~~If the teacher gave you your homework in purple paper, you would not be able to see what you wrote because the paper is too dark.~~ [If your teacher gave you homework on purple paper, you would struggle to read your writing because the paper is too dark.]

~~Secondly, You can be creative with white paper.~~ [Secondly, you can be creative with white paper.] #2 ~~If you say white is too plain and boring, well you are wrong.~~ [If you think white is too plain and boring, you are mistaken.] You can design the paper to make it look like a thousand possibilities, filled with rainbows and hope. This is better than a plain blue with no possibilities at all.

~~Finally, the cost of white paper is affordable.~~ [Finally, white paper is affordable.] #3 White paper is easy to find and is perfect for people all around the world. ~~Once you buy white paper, you will soon realise that you barely wasted your money at all.~~ [When you buy white paper, you will realise it is money well spent.]

White is the colour for A4 paper because it is easy to read, and is affordable for all families.
