

Section 1:

#1 (First paragraph) Strengths:

- Your opening question effectively engages the reader
- Your thesis statement clearly states your position on white paper

Weaknesses: Missing Hook Development → Your opening lacks depth and fails to truly grab attention. The question "Have you ever thought of what would be the best paper to use?" is too basic and doesn't create enough interest for a persuasive speech.

Your opening could be improved like this: "Imagine a world without white paper - no pristine canvas for your artwork, no clean slate for your ideas. White paper isn't just a writing surface; it's the foundation of human creativity."

#2 (Second paragraph) Strengths:

- Your use of specific price comparison (34.25) adds credibility
- You attempt to support with practical reasoning

Weaknesses: Underdeveloped Arguments → Your cost argument lacks specific details and evidence. You mention a price difference of "34.25" but don't specify the currency or provide context. The shipping claim needs supporting facts.

Your argument could be improved like this: "In the UK, a ream of white paper costs £3.50, while coloured paper costs nearly £7. This significant price difference means choosing white paper could save your school hundreds of pounds yearly."

#3 (Third paragraph) Strengths:

- You attempt to discuss the manufacturing process
- You try to compare white and coloured paper production

Weaknesses: Informal Language and Unsupported Claims → Your writing uses casual phrases like "made out of heaven". You make claims about production without proper explanation.

Your point could be improved like this: "The production of white paper is more environmentally friendly, requiring fewer chemicals and processing steps compared to coloured paper, which needs additional dyes and treatments."

■ Your speech needs stronger evidence to support your claims. Currently, your arguments rely heavily on personal opinions rather than facts. Try adding specific examples, like how artists specifically use white paper or real cost comparisons from local shops. Your paragraphs are quite short - expand each point with more details and examples. Make your comparisons fairer by acknowledging when coloured paper might be useful, then explain why white paper is still better.

Actionable Task: Rewrite your second paragraph focusing on the cost argument - include real prices from three different shops and explain exactly how schools or offices would save money by choosing white paper.

Score: 37/50

Section 2:

Why White Paper Is The Best

~~Have you ever thought of what would be the best paper to use?~~ [Have you ever wondered which type of paper is truly the best to use?] It is definitely white paper,~~[.] throughout [Throughout] the text,~~ you will notice why white paper is the superior selection. Here are my three reasons why white paper is the best.

#1 ~~Firstly,~~ [First,] white paper is the best because it is so cheap, affordable and easy to get. If you ~~compared~~ [compare] the price [,] it would make a difference of ~~34.25~~ [£34.25] if you were to buy a hundred of each. If you were to buy ~~colored~~ [coloured] paper [,] it mostly would [have] been shipped from another country, but ~~on the other hand~~ [in contrast,] white paper can just be made in your country.

#2 ~~Secondly~~ [Second], white paper doesn't require ~~much~~ [many] ingredients. White paper is made by chopping trees and bringing ~~it~~ [them] to a factory [,] but ~~colored~~ [coloured] paper needs to do the same but at the end [,] it needs to be artificially ~~colored~~ [coloured]. White paper is better because it is bright [,] plain and is made out of heaven.

#3 Lastly, normal white paper is just easier to do art on because there's nothing that could ruin it, just only your drawing ~~could~~ ~~if~~ [could, if] ~~your~~ [you're] bad at lines. ~~Colored~~ [Coloured] paper is just the worst because it just feels odd for it to exist [;] just plain white paper feels classic and the rest looks like garbage. For example [,] if we only had ~~colored~~ [coloured] paper [,] our paintings would look bad and wouldn't sell for good prices [;] if we only had white paper [,] it would look good and the prices would go up. Our paintings are only good and priced like the Mona Lisa because of white paper.

In conclusion, we have discovered in the text that white paper is the greater choice because it is ~~much~~ [more] affordable, makes better ~~art-works~~ [artworks] and it doesn't waste important ingredients.
