

## Technology and Screen Time: How Much is Too Much?

Picture this: it's the 1980s and everyone isn't on their phones or devices and instead everyone's talking to each other having conversations you might think this is how it is today right? WRONG now people are spending far too much time on their phones. Even children! These young minds cannot be looking at a screen. These kids used to be filled with bright eyes absorbing the information around them but now their eyes are pale with no life in them. Which is why it is imperative that there should be limits for screen time.

So, the solution is simple stop using phones. By reading books and playing sport, they could be much more productive and enjoy themselves in a different way. They can learn new things and understand more new things. So that is why you must stop using phones now!

## The Environment: Should Plastic Be Banned?

Plastic should undoubtedly be banned because it harms our environment and us. Let's take an innocent sea turtle for an example. It thinks it has spotted a jelly fish in the ocean but no, it is a plastic bag someone threw in the ocean. The sea turtle eats it and unfortunately dies. This is the reason why plastic is so harmful and must be banned ASAP. Now you might be thinking why you can't just recycle plastic? Well, plastic cannot be recycled repeatedly and eventually you will have to throw it out.

So, you must stop using plastic now. There are also other alternatives for plastic. Like glass, which can be recycled repeatedly without losing quality. An easy way to go shopping is to use reusable bags that can be used forever. So, if there are other alternatives to plastic STOP USING PLASTIC NOW!

## Education & Learning: Is It Better to Learn at School or at Home?

I think it is an absolute must to learn at home than school because of 2 reasons focusing and environment. Firstly, focusing is important and with a class of 30 or more kids which are constantly chatting you will not be able to focus or concentrate on any of your studies. Eventually, you will get stressed and not be able to do tasks and get worse grades in school.

Lastly, the environment at home is much better than at school because at home it is just you and your parents. However, at school you must worry about bullying which is a big problem, lack of resources, student conflict and cyber bullying and with all of that in your head, it is hard to think about other things so it would be amazing if that was all out of your head. So, that's why homeschooling should be happening now.
