

## Section 1:

### Part #1:

**"Ahhhhhh! A new day means a new ... huh? What was that rumbling sound!" exclaimed Tom. Just as he was about to finish his saying, an anonymous rumbling sound was heard in the distance. The sound slowly grew louder, it was defining. And in the blink of an eye, the floor cracked open like an earthquake just happened. Poor Tom unfortunately was in the middle of the crack and hopelessly fell into the void of the unknown. Tom who was in utter confusion examined the white void around him. It was almost like any video game.**

Strengths: Your piece effectively builds tension with the mysterious rumbling sound. The quick transition from normal morning to chaos captures attention.

Weakness: Run-on sentences → There are several sentences that run together without proper punctuation, making it difficult to follow the action sequence. The sentence "Poor Tom unfortunately was in the middle of the crack..." continues for too long without breaks, causing confusion about what's happening to Tom.

Exemplar: *"Poor Tom, unfortunately caught in the middle of the crack, hopelessly fell into the unknown void. In utter confusion, he examined the white emptiness surrounding him—it resembled something from a video game."*

### Part #2:

**Tom strolled around the place trying to adjust to this new environment. It was only until he realised he could fly, this world could bend the laws of physics. Tom grabbed his trusty blue coffee cup and noticed that it was now colorless. Just then a smile appeared on Tom's face.**

Strengths: Your introduction of physics-defying elements (flying) shows creativity. The detail of the colourless coffee cup effectively illustrates the strangeness of this new world.

Weakness: Underdeveloped reactions → Tom's emotional and psychological responses to these extraordinary discoveries are minimal. His reaction to suddenly being able to fly is understated, missing an opportunity to explore what would be a profound realization.

Exemplar: *"Tom's heart raced as he discovered he could float above the ground. 'I can fly!' he gasped in disbelief, testing his new ability with cautious movements. This world truly bent the laws of physics! When he grabbed his trusty blue coffee cup and saw it had turned completely colourless, a broad smile spread across his face as he began to understand the possibilities."*

### Part #3:

**"Welcome to Downfield castle here is where we control each universe including yours!" said B3N. Just then the leader of the castle (Professor 333444) shuffled past them. Tom stared at the robot. The professor had wheels instead of legs colored in a turquoise design. B3N grabbed Tom's hand and ran toward the professor.**

Strengths: Your introduction of the castle adds an interesting setting to the story. Creating different characters with unique features (like the professor with wheels) shows creativity.

Weakness: Rushed worldbuilding → The revelation about a castle that controls universes is introduced abruptly without sufficient build-up or explanation. This significant information is simply stated rather than integrated meaningfully into the storyline.

Exemplar: *"Welcome to Downfield Castle," B3N announced with reverence in his voice. "This ancient structure houses the central controls for each universe, including yours!" Tom's jaw dropped as he tried to comprehend the magnitude of what he was hearing. The castle's imposing architecture seemed to defy all logic, with staircases running in impossible directions and doorways that appeared and disappeared."*

■ Your story presents an imaginative concept with its physics-defying void world and interesting characters like B3N. However, the pacing feels rushed in places, particularly when introducing major elements like the castle that controls universes. Additionally, you could enhance your story by expanding on Tom's emotional journey—his fear, wonder, confusion—as he encounters this strange reality. The dialogue between characters is a good start, but adding more descriptive details about this peculiar environment would help readers visualize this unique world better. Also, consider developing a clearer problem or challenge for Tom beyond simply wanting to return home. The friendship

between Tom and B3N could be more deeply explored, showing how they grow to trust each other. Your ending wraps up quickly—perhaps consider expanding on how Tom's adventure changes him or how B3N adapts to life on Earth.

## Section 2:

the world where the laws of physics don't apply

It was a normal Saturday morning for the residents of Happy ~~Vile~~ [Vale]. Tom, one of the residents of this ~~marvellous~~ [marvellous] paradise, ~~budged~~ [nudged] out the door and sat down on the table that ~~nestle~~ [nestled] in the front with his cup of coffee.

"Ahhhhhh! A new day means a new ... huh? What was that rumbling sound!" exclaimed Tom #1

Just as he was about to finish his ~~saying~~ [sentence]. An ~~anonymous~~ [unknown] rumbling sound was heard in the distance. The sound slowly grew louder, it was ~~defining~~ [deafening]. And in the blink of ~~and~~ [an] eye, the floor cracked open like an earthquake just happened. Poor Tom unfortunately was in the middle of the crack and hopelessly fell into the void of the unknown Tom who was in utter confusion examined the white void around him it was almost like any video game.

Tom strolled around the place trying to ~~used~~ [get used] to this new environment. It ~~only-until~~ [was only when] he realised he could fly, this world could bend the laws of physics. Tom grabbed his trusty blue coffee cup and noticed that it was now ~~colorless~~ [colourless]. Just then a smile appeared on ~~Toms~~ [Tom's] face. #2

For the rest of his days he tried to make sense of the environment around him experimenting with every way he could. However his state of being isolated had some concerns. However this all changed one day. Tom was out of his house (that he made a couple of days ago) minding his own business exploring this unknown until he caught a glimpse of a hunched silhouette rushing toward him. Curious, he eyed at the mysterious sight. ~~just~~ [Just] then it began to talk.

**"Finally, a human!" cried the object who was panting heavily, "Hi my name is B3N but you can call me Ben. Welcome to THE VOID. I am an AI robot from this world."**

**"Nice to meet you Ben. But do you know how I ended up here 20 days ago? And if you do can you please tell me how to take me back to my house?" questioned Tom**

**"Ah. The universe mix-up in Happy Ville. The robot universe mixed up with earth. Luckily I can help you with this. Too Easy!" said B3N**

**B3N ~~snaped~~ [snapped] his computer fingers and soon after the land Tom stood on began to fade and then.**

**"Plop!"**

**Right before Tom's ~~eye~~ [eyes] was a gigantic throne. Tom mesmerised than ever explored the area. He never knew you could teleport in this world.**

**"Welcome to Downfield castle here is where we control each universe including yours!" said B3N #3**

**Just then the leader of the castle (Professor 333444) shuffled past them. Tom stared at the robot. The professor had wheels instead of ~~lags~~ [legs] ~~colored~~ [coloured] in a turquoise ~~designing~~ [design]. B3N grabbed ~~tom's~~ [Tom's] hand and ran toward the professor.**

**"Professor! ~~Its~~ [It's] an emergency! Tom is a human and he needs to go back to earth!" shouted B3N**

**"Oh hey B3N. Oh you may need to bring some materials from .... umm .... oh yeah the other side of the planet." said 333444**

**"Seriously bro!?" raged Tom**

**"In this world you can't travel that far by using teleportation!" exclaimed B3N also frustrated by this predicament.**

**Anyways B3N and Tom left the castle without giving up. And for the rest of the days friendship started to become a thing between them. They faced many challenges along the way like 1V1s, maybe a competition, and even enemies that wanted to steal their special powers. However, they came over the thick and thin and finally**

achieved their goal and came back to the castle. It had been 100 days since Tom arrived here and now it was his turn to leave. However just as he was about to leave B3N jumped in to join him in the journey back to home. Tom closed his eyes and then opened them again. He was back! But this time with his buddy B3N.

"Welcome back Tom we missed you so much!" said Tom's neighbour Harry.

And that was how Tom ~~foyer~~ [Foyer] and B3N 333555 became friends and lived together creating a stronger bond between them.

**THE END**
