Dear Counciller Huang,

The knowledge held in our incomparable library is invaluable [,] and destroying this library is also destroying payloads of knowledge. Not only does ~~the~~ [this] guardian of knowledge [not only] ~~protect~~ [protects] knowledge but also holds intricate books of our history [.]. [W]hat will replace our historic library? A soulless shopping complex devoid of intellectual nourishment. Would you really mitigate history for yet another dire shopping mall? This beacon of life produces the most profound minds in our country, and it also produced your mind. The ~~threat~~ [threats] of losing this monumental player in this community [still] lingers eerily throughout the town, sending chills down the back of our spines.

I just have to urge you to think of our superb library getting demolished by malefic machines. ~~You~~ [We] will feel the tremors in the ground as those [demonic] electric monsters will ~~crunch~~ annihilate ~~that~~ [our] sublime library to pieces. The very air shivers as knowledge and history are torn to shreds. Those mechanical ~~monsters~~ [beasts] will cast an aura of malignity around you, wherever you go you will be met by faces of despair. So just think, do you want to do this sinister deed? It's our library that has nurtured our minds, it's our library that [has] preserved our history, it's our library that deserves protection.

I hope that among that mindset to demolish our beloved library you may choose to spare ~~that~~ [our] innocent library. Me and my community hope for the best [,] so please don't let us down.

Kind regards,

The community
