

Section 1:

**#1 "Imagine standing at the edge of a cliff, staring out at our vast, shimmering ocean. It looks endless. But what if I told you a simple piece of rubbish you throw becomes a major problem. It could impact over millions and millions of marine species and could cause destruction and climate change."**

Strengths: Your evocative imagery creates a powerful visual that immediately draws readers in. The contrast between the ocean's beauty and human impact is effectively established.

Spelling/Grammar → You have several spelling and punctuation errors that distract from your powerful message. The incorrect spelling of "i" instead of "I" and missing spaces after full stops reduce the impact of your writing.

***Imagine standing at the edge of a cliff, staring out at our vast, shimmering ocean. It looks endless. But what if I told you a simple piece of rubbish you throw becomes a major problem?***

**#2 "The sea provides over 50% of our oxygen that we breathe. It absorbs a massive amount of carbon dioxide, helping the Earth maintain its climate. It feeds billion and trillions of people all across the world and it fuels economies around the world. When sea life dies, we lose more than just beauty, we lose balance."**

Strengths: Your inclusion of specific facts about the ocean's importance gives your argument weight. The closing sentence about losing balance is particularly impactful.

Clarity of Information → Several typing errors and unclear phrasing make your important points difficult to understand. The phrase "feeds billion and trillions" likely means "feeds billions and trillions" but reads confusingly.

***The sea provides over 50% of our oxygen that we breathe. It absorbs a massive amount of carbon dioxide, helping the Earth maintain its climate. It feeds billions of people across the world and fuels economies globally. When sea life dies, we lose more than just beauty—we lose balance.***

**#3 "So now, the ocean has suffered enough. The ocean is calling, will we answer? The next time you are at the beach will you throw your rubbish in the bin?"**

Strengths: Your concluding questions effectively challenge the reader to take action. The personification of the ocean "calling" creates emotional impact.

Conclusion Development → Your conclusion feels rushed and doesn't fully reinforce your main arguments. The final question about rubbish focuses on only one small action when your piece discusses much larger issues.

*The ocean has suffered enough from our neglect. It's calling for our help—will we answer? The next time you're at the beach, will you throw your rubbish in the bin? Will you speak up for marine protection? Our blue planet's future depends on the choices we make today.*

■ Your piece shows passion for ocean conservation, which comes through clearly in your emotive language. To strengthen your writing, try developing a clearer structure with an introduction that states your main argument, body paragraphs that each focus on one key point, and a conclusion that reinforces these points. Your persuasive tone works well, but adding more specific examples of how pollution affects marine life would make your argument more compelling. Additionally, varying your sentence structure would improve the flow of your writing. Some sentences are quite short while others run on without proper punctuation. Try combining some shorter sentences and breaking up longer ones. You could also strengthen your piece by including a specific call to action beyond just binning rubbish—perhaps suggesting ways young people can get involved in ocean conservation efforts in their local communities.

Section 2:

If the ocean could speak, would we finally listen?

Imagine standing at the edge of a cliff, staring ~~out a~~ [out at] our vast, shimmering ocean. It looks endless [.]. ~~But~~ [But] what if ~~i~~ [I] told you ~~i~~ [a] simple piece of rubbish you throw becomes a major problem[?] It could impact over millions and millions of marine species and could cause destruction and climate change. #1

Beneath the waves lies ~~a~~ [an] endless world that we may never see again. Swirling schools of silver fish, delicate coral gardens, majestic whales gliding silently ~~though~~ [through] the deep while singing. But, this vibrant life is fading every year by year. That is why ~~i'm~~ [I'm] here to talk about this topic.

You might be wondering, why should we care? Because the ocean is not just just a beautiful mystery with things that are not discovered, ~~it~~ [it's] our life source.

The sea provides over 50% of ~~out~~ [our] oxygen that we breathe. It absorbs a massive amount of carbon dioxide, helping the Earth maintain ~~it's~~ [its] climate. It ~~feels~~ [feeds] billion and trillions of people all across the world and it fuels economies around the world. When sea life dies, we lose more than just beauty, we lose balance. #2

If we don't change courses, we risk our lives by losing air, lifeless waters and no sea food. Protecting sea life isn't just about saving animals. It's about protecting the heartbeat of our planet.

~~So now~~, [Now,] the ocean has suffered enough. The ocean is calling, will we answer? The next time  
~~you~~ [you're] at the beach will you throw your rubbish in the bin?] #3
