

Subject: Meeting Request: Tailored Carbon Footprint Assessment Proposal for Green Earth Technologies

Dear Mrs. Reynold,

I hope that your company is doing well. My name is Felix Ma, and I'm the Marketing Manager at Brightfield Solutions. Our goal is to help organisations measure and reduce their environmental impact.

This email is sent to you to reconnect your earlier interest in our current carbon footprint assessment services. When we spoke last time, which was approximately three months ago, you mentioned that Green Earth Technologies was exploring new opportunities to strengthen its performance. Ever since that conversation that we had, our team has achieved several big successes that I believe can help with your goal right now.

For example, earlier this year we partnered with a company called, EcoLife Manufacturing, a company facing similar challenges in identifying hidden emission sources. Through our deep research and other sources, EcoLife had achieved a 36% reduction in the total emissions and an amazing 21% drop in energy costs within 2 months. Moreover, they also enhanced their brand's ESG credibility, helping them secure new partnerships which includes two major retailers.

Given Green Earth Technologies' strong dedication to sustain a good standard of innovation, I believe a custom tailored carbon assessment proposal can really help with equally providing strong results for your company. Our team blends data and lifecycle evaluation tools, to deliver a measurable reduction in carbon emissions while still supporting your business objectives.

I would really appreciate the opportunity to organise a thirty minute meeting to present this custom proposal for your organisation, discuss your current initiatives, and help prepare for the next potential steps. To make the meeting time convenient, I'm available at the following times in the next two weeks.

- Friday, Oct 18 between 5:30 pm - 7:00 pm
- Monday, Oct 21 between 10:45 am - 2: 30 pm
- Thursday, Oct 24 between 4: 50 pm - 6:30 pm

If these times don't fit your schedule, please feel free to suggest more options, as I will be more than happy to adjust.

If I don't receive another email by the end of the next week, I'll ensure that this message has reached you and whether I should send another email at a more convenient time.

Thanks again for your earlier interest in Brightfield Solutions. I am looking forward to helping Green Earth Technologies not only to track its carbon footprint more efficiently but also to accelerate its path toward a more sustainable, cost-efficient future where there are more and more reduced carbon emissions in our world.

Warm regards,

Felix Ma
